Re: European Union Compliance

Dear Mr. Bowman:

In reply to Larry King's letter of June 1,

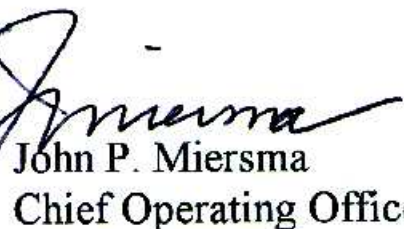

- Please find enclosed a copy of **Iwaki America's** statement concerning pump and related product compliance with the RoHS directive. This compliance program was developed by Iwaki Co., Ltd. for implementation worldwide.
- **Walchem** engaged the worldwide environmental consulting and engineering firm of Mabbett & Associates in 2005 to develop and direct the implementation of a comprehensive RoHS and WEEE compliance program.

Mabbett & Associates concluded that Walchem products are exempt from WEEE compliance insofar as they are sold as components of fixed commercial and industrial installations. To facilitate end users' compliance in any potentially non-exempt installations, Walchem controllers are marked with the Crossed-Out Wheelie Bin insignia.

Further, Mabbett & Associates concluded that Walchem products are exempt from RoHS compliance insofar as they fall within Category 9, Monitoring and Control Equipment and they are components of fixed commercial and industrial installations.

I trust this meets your needs. Please contact me if you have any questions or require additional information.

Sincerely,

John P. Miersma
Chief Operating Officer
